

## **High School Science Teacher 2026–2027 School Year**

Billings Christian School is seeking an inspiring and dedicated High School Science Teacher for the 2026–2027 school year. The ideal candidate is a student-centered educator who fosters curiosity and critical thinking through hands-on experiments, inquiry-based learning, and differentiated instruction. This teacher will create an engaging, collaborative classroom environment where students explore science in meaningful and creative ways.

### **Responsibilities:**

- Teach high school science courses in **Chemistry and Physics**, using engaging, experiment-driven lessons
- Implement differentiated instruction to meet the diverse learning needs of students
- Create hands-on, inquiry-based learning experiences that make scientific concepts tangible and memorable
- Encourage critical thinking, problem solving, and scientific curiosity
- Collaborate with a team of teachers to align curriculum, share strategies, and support student success
- Communicate effectively with parents and families, partnering to support student growth
- Monitor and assess student progress, providing timely feedback and guidance
- Participate in school activities, professional development, and departmental meetings

### **Qualifications:**

- Bachelor's degree in Education, Science, or a related field
- Teaching certification (or ability to obtain certification)
- Experience teaching high school science preferred  
Strong classroom management and organizational skills
- Excellent communication and collaboration abilities
- Commitment to the mission and values of Billings Christian School

### **Preferred Qualities:**

- Creative and engaging teaching style
- Passion for hands-on, experiential learning and scientific experimentation
- Ability to differentiate instruction for a variety of learners
- Team-oriented and collaborative mindset
- Dedication to investing in the academic and personal development of students
